## **PRESS RELEASE**

### **SOGITEC is awarded a contract for a Finnish Army Aviation NH90 training device**

**SOGITEC INDUSTRIES, a subsidiary of DASSAULT AVIATION, is pleased to announce that it has been awarded by NAHEMA (NATO Helicopter D&D Production and Logistics Management Agency) a contract for the production of an NH90 Medium Range Training Device (MRTD) to be delivered to the Finnish Army Aviation.**

**SOGITEC is already in charge of the development and the production of six training devices for the French Army and the French Navy.**

**The MRTD is a Flight Training Device class simulator equipped with an additional range of tactical mission training features. The MRTD to be delivered to the Finnish Army Aviation is similar to the French Army version. It is enhanced with dynamic 3D-motion seats to render 3D-motion cues. SOGITEC's Sindbad™ database generation system is also part of the delivery.**

**The MRTD will be installed at Finnish Army Aviation base in Utti, south-eastern Finland.**

**In addition to the training medium, Sogitec provides full performance-based in-service support.**
