## PRESS RELEASE

### Second French Army NH90 Multi-Role Training Device Ready for Training at Full Operational Capability

SOGITEC INDUSTRIES announces that NAHEMA and the French Defense Procurement Agency (*Direction générale de l'armement*, DGA) have declared ready for training the second French Army NH90 *Caiman* Multi-Role Training Device (MRTD) at full operational capability.

This second MRTD is operational at the 1st Combat Helicopter Regiment at Phalsbourg Army Base, Eastern France. The first MRTD has been in service since fall 2013 at the NH90 Joint Training Center (*Centre de formation interarmées*, CFIA) at the French Army Aviation Academy in Le Luc, south-eastern France.

This milestone successfully concludes the entry into service phase of the French Army Aviation's two first MRTDs, with all procedures and tactical training functions fully available.

The MRTD is a true FMS (Full Mission Simulator) with EASA level D helicopter modelling and tactical simulation covering the full range of NH90 missions. The MRTD also meets flight and navigation training needs: conversion-to-type, instrument flight, fault and failure management, etc.

The on-going international program provides for the development and production of seven training devices (6 MRTDs and a Full Flight Simulator, FFS) for the French Army and Navy, and the Finnish Army.

#### About Sogitec Industries:

Sogitec Industries is a leading company in the market of support products and services for Aerospace and Defense systems. Sogitec offers a comprehensive range of instruction and training solutions for military and civil aerospace needs, from full training systems to simulation subsystems. The company also operates in major technical publications and documentary systems programs. Sogitec employs over 400 personnel and delivered revenue of 69 million euros in 2013. The company is headquartered in Suresnes (Paris). Two other main facilities are located in Bruz (Rennes, Brittany) and Mérignac (Bordeaux). Sogitec Industries is a subsidiary of aircraft manufacturer Dassault Aviation. For more information: [www.sogitec.com](http://www.sogitec.com).
