FIELD Touch

FIELD Touch is the one-stop shop for all maintenance documents required by technicians and inspectors when working by and within aircraft. Mobile and comfortable under all circumstances, FIELD Touch removes hidden costs and burdens caused by paper-centric processes. It saves huge amounts of time spent away from aircraft looking for additional information.

FIELD Touch is the essential tool for true paperless conversion of your aircraft maintenance organization whatever your PLM/CAD/publishing systems, technical documentation specifications, cloud or local server infrastructures and tablets/desktop/smartphone devices. It also comprehensively streamlines tasks and relations by connecting people toward unrivalled 3D displays.

Key Features

A ONE-STOP SHOP FOR RELEVANT CONTENT

As the need for being able to work on multiple aircraft models and systems gets stronger, FIELD hosts multiple technical publications into its unified browsing environment. Manuals, manuals supplements and any other document you may need to work with are all seamlessly integrated.

AMAZING 3D PERFORMANCES

Our unique FAST^{3D} technology processes the most massive 3D graphics to provide obvious scope/purpose/audience displays instantaneously. 3D remains fluid while part selection triggers a broad variety of user-oriented services.

UNMATCHED INTERACTIVITY

FIELD leverages rich data structures for increased work efficiency. Whatever the ongoing tasks, dynamic documents offer you to move instantly to any topic of interest. Every word may contain hyperlinks, a preview of targeted information with click-back capabilities, annotations, definitions or discrepancies.

Specifications

USER EXPERIENCE

Responsive user interface
"Mobility First" concept
Branded application

NAVIGATION

Semantic-wise queries leveraging multiple dictionaries
"Table of content-breadcrumb-back" combined features
Multi-purpose bookmarks

MULTIMEDIA

Foldable text
FAST^{3D} graphics (with FIELD Booster)
Line-arts highlights (wires, callouts, signals, etc.)

FORMATS

Full support of ATA/S1000D collections (with FIELD Builder)
Multimedia (MP3/MP4/SVG/HTML5/PDF)
IoT compatibility

SOCIAL

PDF anything, annotate and electronically send it to anyone
Record and share discrepancies

CONNECTIVITY

Check for updates, download
Normal Revisions, quick updates/temporary revisions
Supplements and "integrated" supplements
Cloud-based, NAS or other file-sharing solutions

TECHNICAL MANUALS ENHANCEMENTS

Millions of hyperlinks
Unlimited text-graphic integration
SN filtering
Equipment/wire-focused navigator

PLATFORM OPTIMIZATIONS

Apple IOS: SendTo feature, notifications, iPhone/iPad support
Microsoft Windows 7+: Multiple instances/windows

SOGITEC DIGITAL PIPELINE encompasses CBT, VMT, HUMS & FIELD (Touch, Builder, Card, Booster, API).
